Muhammad Ehsan
Software Engineer | Frontend Developer

With over 2 years of experience in UI development and 1 year specializing in frontend technologies, I have a strong foundation in creating dynamic, user-friendly web applications. Proficient in HTML, CSS, JavaScript, Vue.js, I excel in building responsive interfaces using modern frameworks like Tailwind CSS and Vuetify. Recently, I've been working with Firebase for backend integration, allowing me to create full-stack solutions. I'm focused on delivering high-performance web experiences.
